DEPARTMENT OF CHEMISTRY

Extension Lecture on HUMAN VALUES

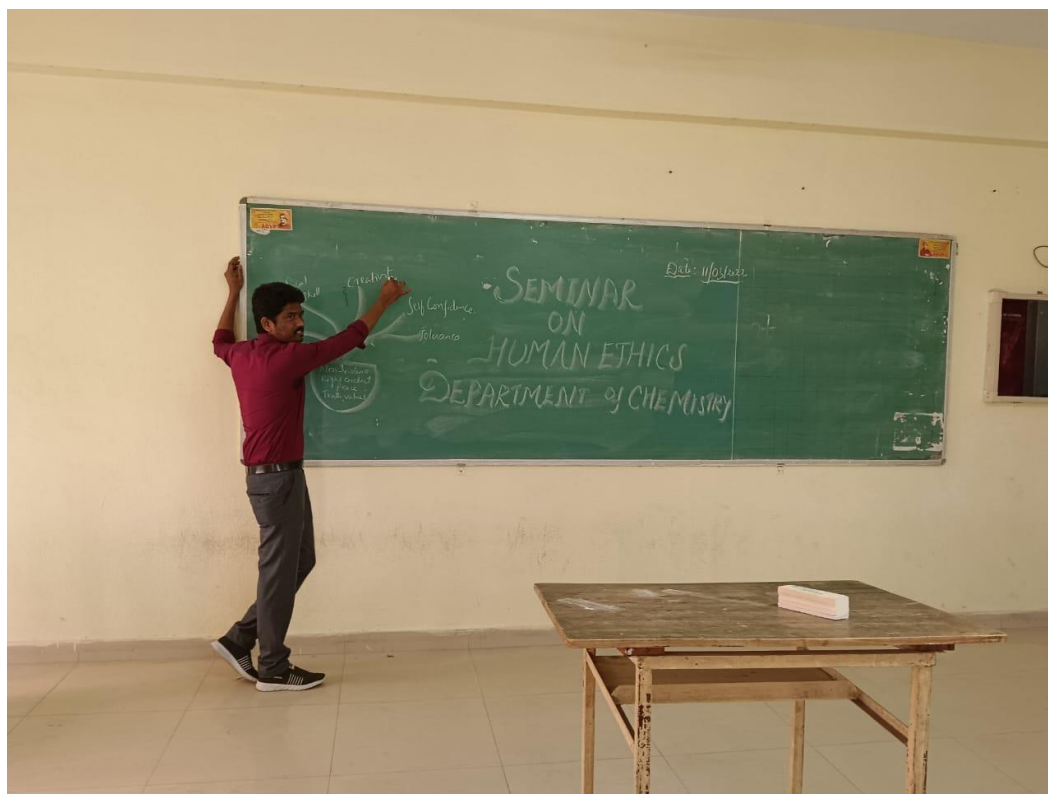

The Department of CHEMISTRY conducted a Seminar on March 23rd, 2023 based on Human Ethics by Dr. G.Chandrasekhar. Human values play a vital role in individual relationships, Organizations as well as in society. It includes Honesty, love, peace, loyalty etc. These are the qualities that are important for humans in

all the stages. Crises in Human Values - Women face a lot. If we possess some basic human values then we will not violate the General rules of our constitution which will lead to a peaceful life for the society.

Chemistry of Vitamins and non steroidal hormones:(15h)

- (a) Chemistry and synthesis of the following vitamins: A1, A2, B1, B2, B6, H, K, and C.
- (b) Chemistry and synthesis of non-steroidal hormones: Oxytocin, Thyroxin, and Adrenalin.

Structure determination of Insulin.

Kishanpura, Hanamkonda

DEPARTMENT OF BIOTECHNOLOGY

ACTIVITY RELATED TO CROSS – CUTTING EDGES

Program on PRODUCTION OF BIODIESEL USING ALGAE

Date: 07/11/2022 , Venue: Auditorium at 10:00 am

Biodiesel has gained much attention in recent years due to its eco-friendly nature, non-toxic characteristics, Biodegradability and lower net carbon cycle compared to conventional diesel fuels. In this regard oil from algae was extracted using n-hexane and diethyl ether as solvents and later the extracted oil was converted into biodiesel via tans-esterification reaction using sodium hydroxide as catalyst.

Report:

Production of Biodiesel towards environment sustainability was conducted in the Department of Biotechnology during the Academic Year 2022 – 2023.

ESTIMATION OF BIOLOGICAL OXYGEN DEMAND FROM DIFFERENT WATER SAMPLES on Date: 03/01/2023.

Biochemical oxygen demand is the amount of oxygen consumed by bacteria and other microorganisms while they decompose organic matter under aerobic conditions. The common lake or stream contains small amounts of oxygen in the form of dissolved oxygen (DO). Dissolved oxygen is a crucial component of natural water bodies, maintaining the aquatic life and quality aesthetic of streams and lakes. The decay of organic matter in water is measured as biochemical oxygen demand. Environmental stresses and other human-induced factors can lessen the amount of dissolved oxygen in a water body. Biological oxygen demand is essentially a measure of the amount of oxygen required to remove waste organic matter from water in the process of decomposition by aerobic bacteria. To comply with BOD limits, commercial production and manufacturing industries are required to implement a wastewater pretreatment or disposal program.

Report:

Biological oxygen demand from water samples towards environment sustainability was conducted in the Department of Biotechnology during the Academic Year 2022 – 2023 to check the concentration of water pollutants and design further treatment processes.

Department of English

Awareness Program

on

Environmental Sustainability

Report on Environmental Sustainability:

The Department of English on 20/10/2022 conducted an awareness program on Environmental sustainability which the world is acting as the burning issue. The students were imparted knowledge regarding the causes of environmental disturbances and made them clear to realize their responsibility towards the nature because the Earth is a finite place with limited land, water and wildlife. The learners identified their negligence towards nature which in turn harm to mankind. Students promised to plant saplings in their surroundings and take care of them. They provided saplings in the institution to develop harmless environment.

Professional Ethics on Gender Bias

Report on Professional Ethics:

A program on professional ethics was conducted by the Department of English on 4\11\2022. Gender bias is the tendency to prefer one gender over another. It is a form of unconscious bias or implicit bias which occurs when one individual unconsciously attributes certain attitudes and stereotypes to another person or group of people. Gender bias is full of attitudes, laws, taboos, preferences and behaviors' that differentiates and discriminates against either sex. With the prevalence of gender discrimination and social norms and practices, girls become exposed to the possibility of child marriage, teenage pregnancy child domestic work, poor education and health, sexual abuse exploitation and violence.

Many of these manifestations will not change unless girls are valued to a greater extent.

1. Professional Ethics and code of conduct:

Professional Ethics and code of conduct by Prof. S.V.S.N.Sharma

Prof. S.V.S.N. Sharma an eminent speaker has the capability of motivating the students. He is adept in reciting slokas in Sanskrit and giving apt examples. He clearly explained the role of students in colleges and alerted them from deviating from their path. He also asked the parents to play a direct part in the career of their children and be partners in their development by encouraging them in every stage of their life. Choosing a goal is the first step to keep any one motivated and to achieve.

2. Professional ethics for MBA students:

Professional ethics for MBA students by Prof. Rajiah

Professional ethics are concerned with the concept and framework of moral right or wrong as applied to a professional organisation, execution policies and behaviours. Though education in its truest sense is not a profession, for practical purpose here we would address it to be a profession so that an institutional framework of ethics in higher education may be propounded.

3. Ethical values in students:

Ethical values in students by Dr. B. Vishnu Kumar

Every student has to remember that there are many aspirations from them. They should always respect their Parents, teachers. That is their first duty. They should always have aims and aspirations and set their goals. It is the duty of every student to aim and work towards that goal. Maintaining discipline is their prime duty. In addition they should be persistent, diligent as well as try to achieve as many skills as possible in college. Science students should always pay attention to getting practical skills. Then only they will be employable.

4. Human Values in students:

Human values in students By Ms Safia Sulthana

In today's world, high-quality education is becoming increasingly important. Students need to be trained not just for academic and professional success, but to be equipped with essential life skills and values needed to navigate through the various challenges they may encounter in life. This is why human value education has become an important aspect of modern education.

Human value education consists of teaching students about the values, beliefs, attitudes, and behaviors that are essential for leading a successful and fulfilling life. It aims not just to impart knowledge, but also to develop students who are empathetic, kind, respectful, and responsible members of society. Some of the most important human values that are taught in modern education include:

Compassion is the ability to understand and feel the pain and struggles of others. Students need to be taught compassion so that they can develop the ability to empathize with others and take action to help those in need.

Honesty is the foundation of trust, and a critical value that students need to learn early on in life. It is important for them to understand the importance of being truthful, both in their personal and professional lives.

Respect is a value that should be given and received by all. It involves treating others with dignity and honor, regardless of their social status, ethnicity, or background. Students need to be taught to respect themselves, their peers, and those in positions of authority.

Responsibility is the ability to take charge of one's actions and be accountable for the outcomes. Students should be taught to take responsibility for their behavior and actions, and to recognize the impact they have on others around them.

5. Professional ethics for Business Management:

Business Ethics is the behavior that a business adheres to in its daily dealings with the world. The ethics of a particular business can be diverse. They apply not only to how the business interacts with the world at large, but also to their one-on-one dealings with a single customer. When business people speak about “business ethics” they usually mean one of three things avoid breaking the criminal law in one’s work-related activity avoid action that may result in civil law suits against the company and avoid actions that are bad for the company image. Businesses are especially concerned with these three things since they involve loss of money and company reputation.

6. Professional Ethics for Faculty:

Professional Ethics for Faculty by Dr. A. Seshachalam, Principal

Prof. A. Seshachalam stressed that teachers must respect the dignity and rights of the students in expressing their opinion and deal with students justly and impartially irrespective of their religion, caste, gender, political affiliation, social stature, and physical characteristics. They must be able to identify and recognizes the differences in aptitude and capabilities among the students in their class and try their level best to meet their individual needs.

They should help each other to grow professionally and be willing to help each other if the need arises. Teachers must conduct themselves and deliver their professional responsibilities as per the existing rules and adhere to methods and procedures that are consistent with their. The teaching staff must treat the non-teaching staff with the same respect and dignity that they give to their colleagues.

Teachers are obligated to inform guardians of students if they are misbehaving or if they want them to help them improve in their academics. The teacher is answerable to a guardian if the student is not performing well.

Report on Professional Ethics Programmes for students of MBA

Vaagdevi Degree & P.G.College, Hanamkonda, Department of Business Management (MBA) is a source of learning for the students of MBA. The students are trained in following the ethics and value based education in this competitive technological world. From the perspective of MBA, students ethical principles like helping the needy, providing the justice, being honesty, being good and doing good and fidelity to be practiced. The basic cultures followed in the department of MBA are universal brotherhood, self confidence development, open minded learning, helping the poor are regular practices in the institute whenever the situation permits.

The Department of MBA consists more number of girl students and as a due respect to them, Women's Day was observed as a mark of respect for our female students, and achievers were recognized in order to encourage our dynamic female students. The commercial content of education model to the next generation as we produce future managers, entrepreneurs, administrators, and leaders of the nation is to make wealth through honest and lawful means and never resort to unethical practices at the expense of others.

The research scholars undertake a Research methodology course work in the II semester of subject Business Research Methodology for the students about the ethics in research to be followed Plagiarism is strictly prohibited in all academic materials created by our faculty members, and we ensure that only original contributions from our faculty and research scholars are sent to journals for publication. This determines the quality and originality of faculty member's academic contributions.

In the MBA II Sem of course work subject Business Ethics paper is taught to the students and created the awareness about the Ethics practiced in the business scenario, Ethical practices followed in the functional scenario of Business.

In the MBA III Sem subject on Business Law and Ethics is taught by the Faculty and Professionals from different functional areas, making a clear distinction between Ethics and Values, and importance of ethical traditions in a country like India.

Sri G.Nagaraju Garu, President ,District Consumer Disputes Redressal Commission, Warangal addressing the students and faculty of MBA on Ethics and Values on 21..12.23.
